ABSTRACTED-PUB-NO: SU 1506417A

BASIC-ABSTRACT:

The endoscope has a plano-parallel plate (1) contg. a plano-convex and concave-plane lenses (2,3) acting as a correction component with negative optic power. A plano-convex (5), biconvex (6) and bi-concave (8) lenses form a power component. An aperture diaphragm (4) is situated on a flat surface between the plate (1) and the lens (5). It has focal length of 0.5mm,

aperture ratio of
1:4 field of view 80 deg. and optical dia. of 0.7mm.
USE/ADVANTAGE - In
optical instrumentation e.g. in medicine, in endoscopes
with image transmission
channel of 1mm dia. Improves image quality and is easier to
use.
Bul.33/7.9.89.
